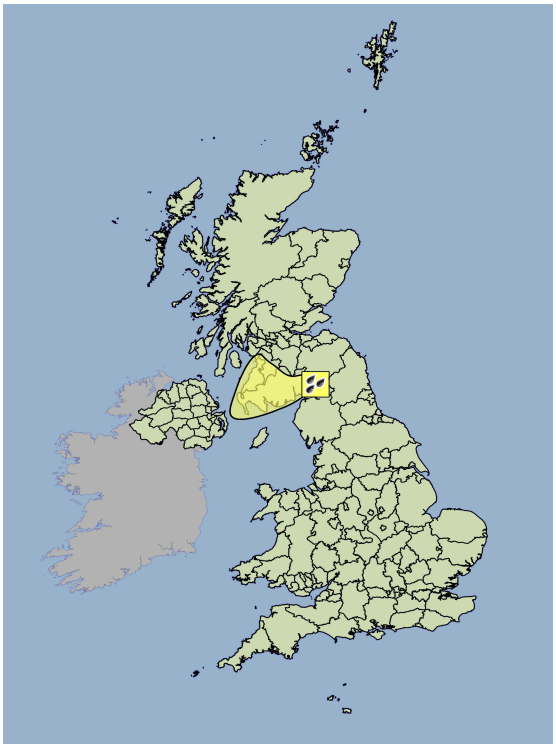
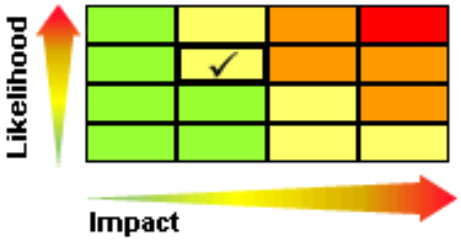
National Severe Weather Warning Service





Chief Forecasters Assessment
A frontal system containing mild and moist Atlantic air will move east across the UK later Monday and through the course of Tuesday. This rain is likely to be heaviest and most persistent over hills, with scope for 50 mm, locally 80 mm, over the most exposed sites.

This alert is likely to be updated during the coming days in the light of new information.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **00:05 on Tue, 01st Mar 2016** until **12:00 on Tue, 01st Mar 2016**

A period of rain is expected to affect parts of western Scotland later Monday and through Tuesday morning. The rain will become heavy and persistent for a while, especially across the Galloway hills, before clearing away to the east.

Please be aware of the potential for localised flooding and difficult travelling conditions.
